MEMORANDUM

DATE: July 8, 2011

TO: All Council Members

FROM: Allan J. Wade

RE: Council Redistricting

I have attached a preliminary analysis of the redistricting proposal that I have prepared using the 2010 Census data for Memphis. You will notice that the total population for all single districts is 647,102, which is 213 more than the actual City total of 646,889. The total for the two super districts is 646,552, which is 237 less than the actual census data. These numbers are slightly different from the actual number because a number of precincts within the City and some contiguous with the county precincts are "split" meaning a part of a precinct may be in two (2) districts or in two super districts or in a city precinct and a county precinct.

Census data is broken down into census block, which within the City means over 12,000 census blocks. OPD was required to meticulously convert these smaller bits of data into split precincts to exclude parts of precincts that are in the county. In any event, the variations [213 and 237] are insignificant for the purposes of the redistricting.

Overall, the City's growth in the past 10 years was static. Districts 3, 4, 6, and 7 lost population. District 5 remained constant. Districts 1 and 2 gained population. The United States Constitution guarantees that every vote must count equally with every other vote. This is the one-man one vote principle. Under this principle every district must be substantially equal to every other district; recent court decisions have determined that substantially equality will be achieved if there is no greater deviation of 10% between the highest and lowest districts; in other words no district can be greater than 5% higher or lower than the average of all districts. No single member district can be less than 87792 [5% lower than 92413] or higher than 97033 [5% higher than 92413].

In addition to these requirements the 1995 Voting Rights Decree requires the City to maintain minority voting power. This requires a plan that provides substantial black majorities in at least seven (7) of the thirteen (13) districts. We also must make each district reasonably compact and all precincts must be contiguous. We always try to minimize changes in districts to the maximum extent, but this is the last consideration.

The net effect of the population shift eastward means that population must be redistricted westward. Since Districts 1 and 2 have the greatest population, the excess must be shifted from the far east to the far west. Because the lower populated districts are not contiguous to Districts 1 and 2, population had to be shifted from district to district westward. This like a game of dominos.

Overall, we have minimized the number of precincts moved between single member districts to 17 and the number of precincts moved between super districts to 7. The lowest single district is 89,387 or 3.3% less than the median and the highest district is 95,273 or 3% higher than the median. The difference between super districts is 402 persons which is less than 1% of the median. At least seven districts have a black population in excess of 75% thereby preserving the voting rights requirements.

AJW
